Welcome to our website! We appreciate and thank you for choosing our practice for your dental care. Our philosophy of care is to provide the best quality of care to all of our patient's individual needs. We achieve this with the following key elements:

- We are truly caring about our patients and want you to feel very comfortable with our entire staff.
- We recognize that each patient is an individual and our goal is to help you retain your teeth in comfort, function and esthetics for a life time.
- We strive to be thorough in everything we do, providing you with the best quality of care.
- We make every effort to explain all treatment options and to the best of our ability, your dental insurance benefits.

Please download the patient information form and the medical history form. By completing these forms prior to arriving at our office, it will save you both time and stress. It will allow you time to research any information that is not readily available.

If you have dental insurance, please complete the applicable sections and please bring in your current dental insurance card. In order to submit claims on your behalf, we will need the all information for the insured party, including responsible party, employer, etc.

All insurance plans are different; please bring in your current booklets of coverage to help us determine your applicable benefits.

If you have any questions, please do not hesitate to contact our office.

Thank you
